POWERSTEP ARCHMOLDS FULL LENGTH INSOLES

Archmolds feature polyurethane cushioning over a full-length, heat-moldable sub-layer that includes a deep heel cup and adequate arch support for motion control. Archmolds™ provide a custom-like, personalized fit and mold to the shape of the foot without compromising support. Archmolds™ insoles help support and align the body properly during daily activities or while walking, running, skiing and hiking. They also aid in the relief and the prevention of many common problems including heel and arch pain due to Plantar Fasciitis, heel spurs, runner's knee, overpronation and knee and back pain.

STANDARD

Moderate Cushioning and Full Support
1.5mm Polyurethane Cushioning
